**EM Professional Development Programs**

**Courses and workshops offered by the Air & Waste Management Association**

**APRIL 10, 2002**  
**AIR-270: Recent Advances in Continuous Emission Monitoring**  
Glendale, CA  
Instructor: James A. Jahnke, Ph.D., Source Technology Associates  
This course presents a review of regulatory requirements and technical issues in the field of continuous emission monitoring (CEM), including highlights of new programs requiring CEM systems, developments in instrumentation, and issues associated with monitoring systems and certification requirements. The course is designed for engineers and other technical personnel responsible for the development or regulation of CEM programs. It is being held in conjunction with A&WMA West Coast Section’s Annual Meeting. For more information, visit the A&WMA Web site at www.awma.org, or contact Carrie Hartz, Education Programs Coordinator, at phone: (412) 232-3444, x3120 or e-mail: chartz@awma.org.

**APRIL 11–12, 2002**  
**Fundamentals of New Source Review—Updated Workshop Series**  
Las Vegas, NV  
The focus of this workshop is to present the fundamental requirements of the New Source Review program under Title I of the Clean Air Act. U.S. Environmental Protection Agency representatives will serve as technical chairs for the workshop. The workshop series will continue September 19–20, 2002, in Albuquerque, NM, and October 3–4, 2002, in Hartford, CT. For more information, contact A&WMA Member Services at phone: (800) 270-3444 or (412) 232-3444.

**APRIL 16, 2002**  
**EMGM-231: Negotiation Strategies for Environmental Professionals—A Framework for Successful Outcomes**  
St. Louis, MO  
Instructor: John W. Ubinger, Jr., Esq., Jones, Day, Reavis & Pogue  
Learn practical tips and techniques for systematically analyzing and effectively resolving disputes through negotiation and other conflict resolution processes. This interactive course will use examples of various environmental disputes to explore the nature of environmental conflict and to illustrate the application of effective dispute avoidance and dispute resolution concepts. This course is being held in conjunction with A&WMA’s Hazardous Waste Combustors Specialty Conference & Exhibition April 17–19, 2002. For more information, visit the A&WMA Web site at www.awma.org, or contact Carrie Hartz, Education Programs Coordinator, at phone: (412) 232-3444, x3120 or e-mail: chartz@awma.org.

**APRIL 16, 2002**  
**AIR-285: Trial Burn and BIF Compliance Testing**  
St. Louis, MO  
This course will provide participants with practical information for conducting a successful trial burn, BIF compliance test, or HWC MACT performance test. Participants in this course should have a degree in engineering (or one of the physical sciences) or equivalent knowledge gained through professional experience. Registrants should also have a minimum of two years experience in the environmental field or six months in this subject area. This course is being held in conjunction with A&WMA's Hazardous Waste Combustors Specialty Conference & Exhibition, April 17–19, 2002. For more information, visit the A&WMA Web site at www.awma.org, or contact Carrie Hartz, Education Programs Coordinator, at phone: (412) 232-3444, x3120 or e-mail: chartz@awma.org.
