Listed below are the articles appearing in the April 2004 issue of the Journal of the Air & Waste Management Association. A full table of contents can be found by visiting the Journal online at www.awma.org/journal, where A&WMA members can also access and print out complete Journal articles dating back to January 1997. Nonmembers and those without access to the Internet can purchase reprints of Journal articles by calling A&WMA Publications at (412) 232-3444. For membership and subscription information, please call A&WMA Member Services at (800) 270-3444.

Recycling in a Megacity
N.J. Themelis and C.E. Todd, Columbia University

Effect of Substrate Henry’s Constant on Biofilter Performance
X. Zhu, M.T. Suidan, A. Pruden, C. Yang, and C. Alonso, University of Cincinnati; B.J. Kim, U.S. Army Engineer Research and Development Center; and B.R. Kim, Ford Research and Advanced Engineering

Field Validation of an Active Sampling Cartridge as a Passive Sampler for Long-Term Carbonyl Monitoring
N. Shinohara, K. Kumagai, N. Yamamoto, and Y. Yanagisawa, University of Tokyo; M. Fuji, National Institute for Environmental Studies, Japan; and A. Yamasaki, National Institute of Advanced Industrial Science and Technology, Japan

Source Characterization of Atmospheric Heavy Metals in Industrial/Residential Areas: A Case Study in Oman
S.A. Abdul-Wahab, Sultan Qaboos University, Oman

Spatial Variability of PM$_{2.5}$ in Urban Areas in the United States
J.P. Pinto, U.S. Environmental Protection Agency; A.S. Lefohn, ASL and Associates; and D.S. Shadwick, statistician, Chapel Hill, NC

Operational Characteristics of Effective Removal of H$_2$S and NH$_3$ Waste Gases by Activated Carbon Biofilter
Y.-C. Chung, China Institute of Technology, Taiwan; and Y.-Y. Lin and C.-P. Tseng, National Chiao Tung University, Taiwan

Atmospheric Concentrations of PM$_{2.5}$ Trace Elements in the Seoul Urban Area of South Korea
C.-M. Kang and Y. Sunwoo, Konkuk University, South Korea; H.S. Lee, Seowon University, South Korea; B.-W. Kang, Ch’ongju National College of Science and Technology, South Korea; and S.-K. Lee, Hankuk University of Foreign Studies, South Korea

Evaluation of the Industrial Source Complex Short-Term Model: Dispersion over Terrain
S.A. Abdul-Wahab, Sultan Qaboos University, Oman

Temporal Variation in Daily Concentrations of Ozone and Acid-Related Substances at Saturna Island, British Columbia
R. Vingarzan and B. Thomson, Environment Canada

Near-Field Dispersion Modeling for Regulatory Applications
V. Isakov and T. Sax, California Air Resources Board; and A. Venkatram, D. Pankratz, J. Heumann, and D. Fitz, University of California, Riverside

Prediction of the Vertical Profile of Ozone Based on Ground-Level Ozone Observations and Cloud Cover
G.-D. Kim, W.T. Davis, and T.L. Miller, University of Tennessee

A Risk-Based Model to Establish Threshold Planning Quantities of Hazardous Substances
M. Mohan, Indian Institute of Technology, India; and B.R. Gurjar, Max-Planck-Institute for Chemistry, Germany
