Journal of the Air & Waste Management Association Welcomes Special Issues

Special issues of the Journal of the Air & Waste Management Association (JA&WMA) provide a unique venue for grouping and publishing select papers from environmental conferences and research projects. They are a valuable resource to libraries and researchers around the world, presenting a one-stop collection of the most current thinking on important environmental topics.

For conference/project organizers and authors, JA&WMA special issues offer several advantages:

Reputation. In print since 1951, the JA&WMA is the oldest continuously published, peer-reviewed, environmental journal in the world. The JA&WMA is widely recognized as one of the premier publications in the field of air pollution and waste management.

Flexibility. The size of the JA&WMA can be scaled to accommodate the size of the conference/project and the number of manuscripts that pass the JA&WMA’s rigorous peer-review process.

Guest Editorial. The conference chair, project leader, or whoever else is serving as the Coordinating Director is given the opportunity to prepare a one page introduction to a sponsored special issue, describing the manuscripts included and their importance to the understanding of the topic. Note: this could potentially be longer if the level of sponsorship and other factors warranted it.

Let A&WMA know if you have any questions, and feel free to direct authors to contact A&WMA directly with any questions about the process:
A&WMA staff Nancy Bernheisel (nbernhiesel@awma.org)
Technical Editor in Chief Dr. S.T. Rao (straao@ncsu.edu)
